# NEWS – New law in Slovakia

If you use a personal motor vehicle exclusively for business purposes, it is necessary to keep detailed electronic records.

For this reason, we have improved the generation of the log book for you.

Newly, each trip is numbered in the format 20250100001 (YYYYMMXXXXX)

To display this, you need to enable the column (Sequence number of the Log book)

Furthermore, it is now possible to display the following columns in the log book:

- VIN
- Vehicle type
- Manufacturer
- Model

These columns have also been added to the Detailed Log book Report and Detailed Log book Report - Accounting exports.

# NEWS – Driver settings - option to display location on map

The option to display the place of work or the start of the travel order calculation, as well as the place where the driver can be reimbursed for recharging the vehicle, has been added to the driver settings directly on the map.

Using the map, you can easily create these locations. Just click on "New entry" and then select a location on the map.

The location for reimbursement of vehicle charging by the driver can also be edited using the map.

The screenshot shows a web browser window displaying the 'Driver Settings' form. The form includes fields for personal information (Username: Martin, Surname: Švandelik), company details (HI Software Development s.r.o.), and various settings like 'Default purpose', 'Amortize private km', 'Working time', and 'Benefit for driver from private trips'. There are also sections for 'Identification chip / Driver card number' (ID 1, 2, 3) and 'Mobile' (+420777777777). A 'Note' field and 'Driving license no.' are also present. At the bottom, there are 'OK' and 'Cancel' buttons.

Below the form, there are two sections for location management:

- Workplace or start of calculating travel order \*** (New record):

Name	LAT	LON	Radius
Dolní hejvíčská 18, Olomouc	49,603777	17,241503	200

\* It is used for correcting the calculation of meal allowances
- Location to pay for vehicle recharging by the driver \*** (New record):

Name	LAT	LON	Radius	Tariff
Nězkov 49,542667	15,800379	200		Kč/kWh

\* used to calculate reimbursement for charging the vehicle in the driver's home network

On the right side of the screenshot, there is a map interface showing a satellite view of the region around Olomouc and Brno. A red pin is placed on the map, and the map controls (Map, Satellite, zoom, pan) are visible.
