## NEWS – New Sygic maps 12/2025

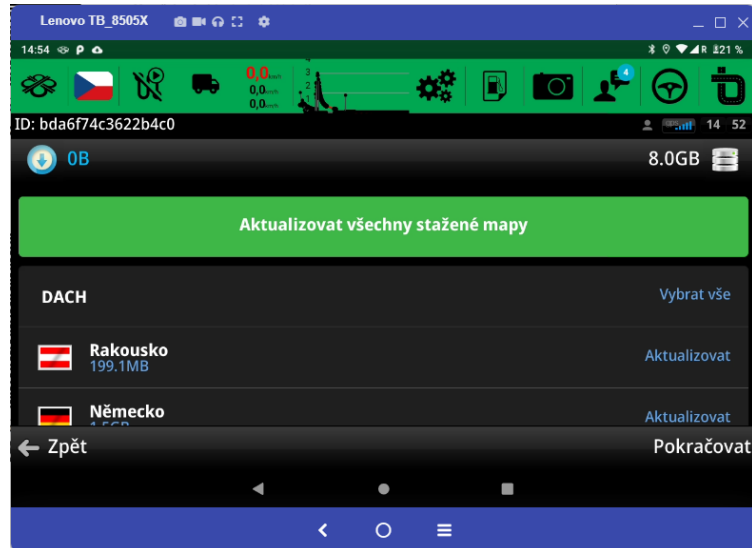

Update your map data in the WD Fleet app.

Sygic company updates maps in its navigation apps every three months.

Our research shows that most of the map data used by drivers in the WD Fleet app for of-line navigation is out of date.

Please go to the Sygic navigation menu—select the 3 dots in the bottom-right corner—Manage Maps - Europe & Russia, and check whether the map data needs to be updated—you'll see an Update option for each country.

The update may take about an hour and requires a Wi-Fi connection.

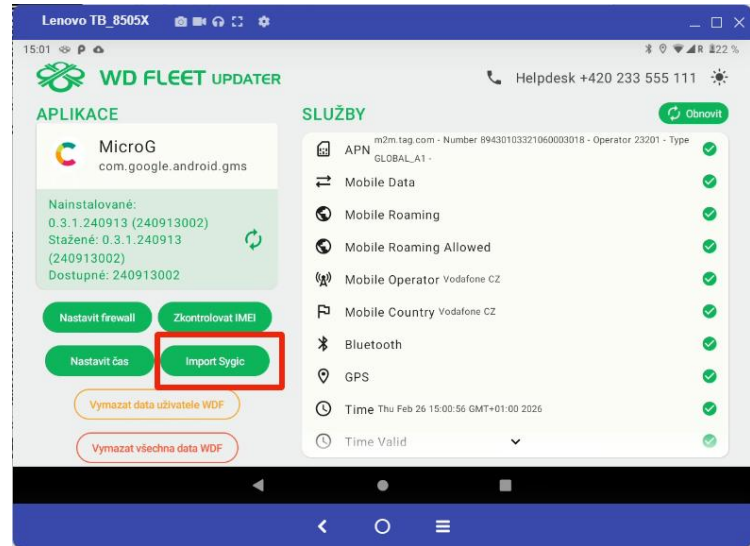

## NEWS – New Sygic maps 12/2025

A faster method is to download the map data from the link below and copy the extracted maps via cable from your computer to the tablet into the SygicLib\Maps folder.

For tablets supplied by our company (custom image), copy the individual map folders to a USB OTG into the SygicLib\Maps folder, connect the USB OTG to the tablet, and use our WD Fleet Updater application. Then click Import Sygic Maps to import them.

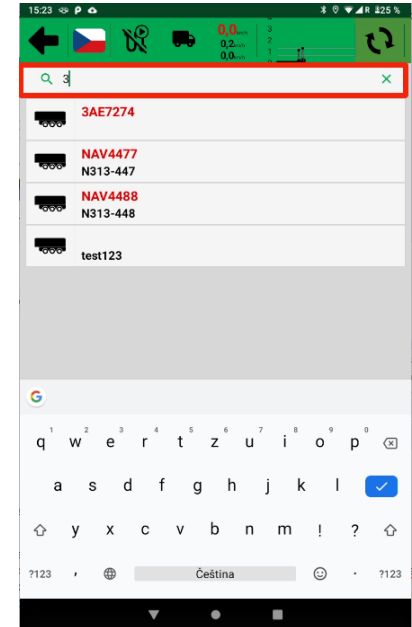

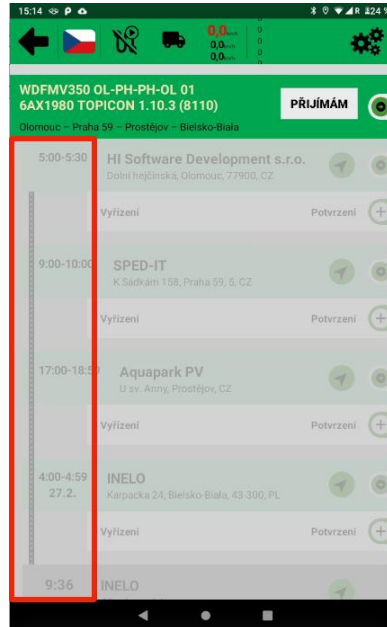

For both methods, we recommend deleting the original map data directly in the Sygic application (using the Remove option).

# NEWS – We have released a new version of the WD Fleet application, version 1.10.3

## This version includes these new features

- improved display of service times for individual
- navigation launch check – if the driver is on an active route, then when navigation is started from the main menu, the system attempts to return the driver to the active route so they are navigated according to the dispatcher's assigned active route
- in the Accessories menu, it is now possible to filter trailers by code or name for easier trailer selection

# NEWS – Car rental – adding information about shared parking space

The car rental calendar has been updated to include information about shared parking space – the legend has been adjusted "Reserved and shared parking".

If user selects "share parking space" when creating a reservation, the approved reservation is displayed in green in the calendar.

# NEWS - Automatic Import of EW Transactions

A new section title "Automatic import of EW costs", has been added to the company settings, containing three checkboxes for configuring automatic import.

This allows the user to choose what should be imported and what should not.

The Section "Automatic import of EW costs" in the company settings is displayed only if the Automatic import of EW costs is active.

Packages:

Automatic import of payments from Eurowag fuel cards. Payment transactions from fuel cards will be automatically imported into the individual vehicle costs. Cards need to be established in the records Refueling cards. The costs are uploaded every 24 hours. Once the package is activated, payments are uploaded up to 10 days retrospectively.

Automatic import supports the following suppliers:

**Driver:**

EW  
EUROWAG

**Configuration:**  
The data synchronization range settings are available in **Setting company**

Synchronize fuel transactions: **Yes**  
 Synchronize toll transactions: **Yes**  
 Synchronize other transactions: **Yes**

You have already purchased this package. Are you sure you want to deactivate it and turn off the display of the agenda included?
